## ABOUT SFF 2021

The Singapore FinTech Festival (SFF) is the world's largest and most inclusive FinTech event that brings together heads of state, financial and technology leaders, FinTech founders, policy makers, investors and multilateral agencies. Organised by the Monetary Authority of Singapore, the Singapore FinTech Festival (SFF) is on its 6th edition. Last year's annual event brought together 60,000 participants from 160 countries – both virtually and in-person – for the development of financial services, public policy and technology.

The theme for SFF2021 is the impact of Web 3.0 on financial services. Over three days, SFF will bring together global knowledge sharing from leading academics, practitioners and thought leaders across 45 reimaged sessions covering designing, building and ensuring sustainable financial services for Web 3.0.
